## Indoor Air Quality Monitor

The GasProbe IAQ simultaneously and continuously monitors up to four parameters: carbon monoxide (CO), carbon dioxide (CO<sub>2</sub>), relative humidity (RH), and temperature (T°). Instantaneous readings are displayed on a large, alphanumeric LCD.

Compact and lightweight, the GasProbe IAQ is loaded with practical features. A real-time clock calculates and records STEL and TWA readings. Additional features include audible, visual and vibrator alarms, one-button calibration and peak reading memory.

A minimum 77-day datalogging capacity is complemented by user-friendly Windows-based data management software, which provides direct access to the GasProbe IAQ and enables data downloading with a few clicks of a mouse.

Once the data is downloaded, the data management software analyzes the information and compiles it in an easy-to-read format. All vital statistics are sorted by date and time. The deluxe software enables interactive graphing and trending through powerful charting tools.

With a full line of accessories to add even more versatility, the GasProbe IAQ is an ideal tool for indoor air quality management.
